

Alliance Mining Expands Trails End Mine Property

August 29, 2008

NEWS RELEASE

CNQ: AMCL

Kamloops, BC — Alliance Mining Corp. ("Alliance" or the "Company") is pleased to announce that it has acquired another 280 acres of mineral claims that expands the Company's Trails End Mine Property located in Yavapai County, Arizona.

The new mineral claims now place the property holdings of the Trails End Mine Property exactly as to a historical report dated September 1983. The Property was under Option to a public company in 1983 for a total consideration of approximately two million dollars. This company failed to raise the necessary capital to carry out its proposed exploration programs and meet its payment requirements on the property due to a declining gold price after acquiring the property.

The only known exploration on this property was done in 2002 by Alliance following assay results of a sampling program completed by Alliance Mining Corp (then called Alliance Mining Services Inc.), the Company had entered into a 50/50 joint venture agreement with Arizona Klondike LLC (Tenure Holders of the Trails End Mine) to explore, delineate and mine any potential economic resources on the Trails End Mine Property.

Alliance identified several possible high grade ore shoots near surface on the northern end of the property with the remaining length of the vein being untested. The main quartz vein is approximately 7000 feet long and 4-8 feet wide on surface outcrops. Alliance learned of certain legal issues contesting the ownership of this property and was legally advised to terminate the joint venture agreement with Arizona Klondike LLC. The tenure holders failed to renew their claims and Alliance acquired the northern part of the Trails End Mine property in January 2008 and now acquired the remaining claims that make up the southern portion of the property placing the property holdings back into its original state. No known exploration has taken place since 2002.

Alliance has acquired the fourteen mineral claims (280 acres) by way of an existing exclusive prospecting agreement with a local prospector who stakes ground for or on behalf of Alliance. The Company is paying US\$14,000 to the prospector who also holds a 2% Net Smelter Royalty on each claim. Alliance may purchase the royalty back for US\$10,000 per claim. Also the Company has suspended its staking- prospecting agreement until such time as the company has carried out at least 50% of its planned exploration programs on the Placerita Project.

The Company's strategy is to concentrate on mining districts hosting hundreds of smaller, higher-grade mineralized zones. These targets will be delineated, any economical zones be mined collectively and processed centrally using extreme gravity processing methods. Alliance is presently focused on the Placerita Project, a group of primarily gold properties in Yavapai County, Arizona.
