

Alliance Mining Acquires Trails End Gold Mine Property

January 14, 2008

NEWS RELEASE

CNQ: AMCL

Kamloops, BC — Alliance Mining Corp. ("Alliance" or the "Company") is pleased to announce that it has acquired the Trails End Gold Mine Property located in Yavapai County, Arizona. The Trails End Mine lies on the western side of the Bradshaw Mountains what we call the "Eastern Placerita Region" and consists of seven lode mineral claims.

The Trails End Mine Property hosts a quartz vein running approximately 4-8 feet wide on surface over approximately 3,500 feet in length. There is one shaft and several drifts located on the property that is still accessible. In 2002 following assay results of a sampling program completed by Alliance Mining (then called Alliance Mining Services Inc.), the Company entered into a 50/50 joint venture agreement with Arizona Klondike LLC (Tenure Holders of Trails End Mine) to explore, delineate and mine any potential economic resources on the Trails End Mine Property. Alliance identified several possible high grade ore shoots near surface on the northern end of the property with the remaining length of the vein being untested. Alliance then submitted a drilling and a 40,000 ton bulk mine sample- plan of operation in 2003. While waiting for the plan of operations to be approved, Alliance learned of certain legal issues contesting the ownership of this property and was legally advised to terminate the joint venture agreement with Arizona Klondyke LLC, this being shortly after the plan of operations was approved. The Trails End mineral claims were not renewed on time for this years filing which made the property available for staking.

Jan C Ross, President of Alliance Mining, stated "one of the biggest setbacks we thought we had while still a private company was to terminate the Trails End Joint Venture agreement in 2003. Now we have 100% ownership of The Trails End Mine at a fraction of the cost of what we originally spent on the property when gold was less than half the price it is now! We know this property and its potential and are very happy on how this has panned out!"

Alliance has acquired the seven mineral claims by way of an existing exclusive prospecting agreement with a local prospector who stakes ground for or on behalf of Alliance. The Company is paying US\$7,000 to the prospector who also holds a 2% Net Smelter Royalty on each claim. Alliance may purchase the royalty back for US\$10,000 per claim.

The Company's strategy is to concentrate on mining districts hosting hundreds of smaller, higher-grade mineralized zones. These targets will be delineated, any economical zones be mined collectively and processed centrally using extreme gravity processing methods. Alliance is presently focused on the Placerita Project, a group of primarily gold properties in Yavapai County, Arizona.
