Alliance Submits Plans for Gold Beetle Mine Properties

Kamloops, British Columbia — Alliance Mining Corp. (the "Company") (CNSX: ALM) is pleased to announce that the Company has submitted a plan of disturbance with the BLM (Bureau of Land Management) of Arizona the Applicable Authority for permitting physical exploration work on the Company's Gold Beetle and Gold Beetle #2 Mineral Properties located within the Company's Placerita Mining Hub project. The application is for drilling up to eighty holes from at least 20 sites on both properties.

The permitted work will begin after property scale and detailed geological mapping and sampling have been completed on the claims to better understand mineralization controls, to better define areas requiring first pass drill testing and to locate new zones of mineralization along several partially exposed quartz veined structures and shear zones.

The exploration drilling will consist of both RC and Core drilling to depths of up to 100 metres. This is the first time the veins are known to have been drill tested. The drilling is to confirm the bonanza and potentially economic bulk tonnage grades reported by past operators and recent due diligence sampling and to test any new zones of mineralization discovered by the surface mapping and sampling program. Additionally the drilling will begin delineating the known partially defined mineralized zones and assist in building 3D geological models of the zones.

Due diligence sampling by Alliance in 2003 on the Gold Beetle property at the Gold Beetle south east adit returned 246.7 grams/tonne (7.2 oz/ton) over 30 cm (1 foot), and at the east adit (0.321 o/t) (grab). Grab samples at workings on the Gold Beetle #2 property ranged from 2.2 to 23.3 g/t (0.064 to 0.679 o/t). Additional due diligence sampling by Kamloops Geological Services and Parkinson Geological Services Inc. in 2004 confirmed the presence of gold mineralization. The Gold Beetle #2 claims are immediately southeast of the Zonia copper mine currently being developed by Copper Mesa Mining Corporation.

Joseph E. (Leo) Lindinger, P.Geol, a director of the company and qualified person within the context of National Instrument 43-101, has read and takes responsibility for this news release.

About Alliance:

The Company's strategy is to concentrate on historical mining districts hosting dozens to hundreds of smaller mineralized zones that can quickly be delineated into resources while targeting higher-grade zones for mining using state of the art technologies that are not only cost effective but environmentally safe. Alliance is presently focused on properties in Arizona. To learn more about Alliance Mining visit www.allianceminig.com

Certain of the statements made and information contained herein is "forward-looking information" within the meaning of the Ontario Securities Act. This includes statements concerning the Company's plans at its mineral properties, which involve known and unknown risks, uncertainties and other factors which may cause the actual results, performance or achievements of the Company, or industry results, to be materially different from any future results, performance or achievements expressed or implied by such forward-looking information. Forward-looking information is subject to a variety of risks and uncertainties which could cause actual events or results to differ from those reflected in the forward-looking information, including, without limitation, the availability of financing for activities, risks and uncertainties relating to the interpretation of drill results and the estimation of mineral resources and reserves, the geology, grade and continuity of mineral deposits, the possibility that future exploration, development or mining results will not be consistent with the Company's expectations, metal price fluctuations, environmental and regulatory requirements, availability of permits, escalating costs of remediation and mitigation, risk of title loss, the effects of accidents, equipment breakdowns, labour disputes or other unanticipated difficulties with or interruptions in exploration or development, the potential for delays in exploration or development activities, the inherent uncertainty of production and cost estimates and the potential for unexpected costs and expenses, commodity price fluctuations, currency fluctuations, expectations and beliefs of management and other risks and uncertainties. In addition, forward-looking information is based on various assumptions. Should one or more of these risks and uncertainties materialize, or should underlying assumptions prove incorrect, actual results may vary materially from those described in forward-looking statements. Accordingly, readers are advised not to place undue reliance on forward-looking information. Except as required under applicable securities legislation, the Company undertakes no obligation to publicly update or revise forward-looking information, whether as a result of new information, future events or otherwise.
